THUNDERSTAMPS

A Letter on Behalf of The ThunderStamps

Team 4907, The ThunderStamps is a completely student-run team of about thirty students from grades nine to thirteen from Parkside Collegiate Institute in St.Thomas, Ontario. Every year, our team participate in competitions directed by FIRST (For Inspiration and Recognition of Science and Technology) Canada, a non-profit organization that runs the FIRST Robotics Competition (FRC) for high school students around the world. Throughout the beginning of the school year, we teach students the fundamentals of building and programming a robot, as well as fundraising, sponsorship, and budgeting. Then, In January, FIRST releases a game video, manual, and rule book delving into the game design for that competition season. Once the game design is revealed, we are given approximately six weeks to plan, build and program a robot before facing off against teams from all over the world.

The ThunderStamps have been incredibly successful in the past, and couldn't have done it without the help of our generous sponsors and mentors. Last season, our team made FIRST Robotics history with our never-before-seen JUMPING ROBOT! Due to our innovation, we were presented with the creativity award at all four of our events and qualified for the FIRST Robotics World Championships, in Houston, Texas. At this intense competition against the best robotics teams in the world, with a 100% success rate on our jumping mechanism, we placed 15th out of 75 teams and couldn't be more proud of this amazing accomplishment!

The robotics team has one of the biggest operating budget of all extracurriculars in our school, with our gross costs exceeding \$50,000 most years. Registration alone costs a total of at least \$21,000, not to mention the over \$15,000 it takes to build an award winning robot. On top of that we must finance travel and other team expenses for our students, teachers, and mentors. Although we are able to fundraise a portion of our budget, we still require assistance from sponsors like you, to reach our fullest potential.

Depending on the sponsorship level you choose, your company will be entitled to a number of benefits, such as advertising and recognition on our website, social channels and robot. Furthermore, you can take pride in supporting a program that is inspiring, encouraging and preparing the next generation of workers to be confident and successful. Anything you have to offer would be greatly appreciated, whether it is a financial donation, a donation of supplies, or a donation in kind. We encourage you to take a look at our Sponsorship Viewbook, to find the best fit for your company. If you have any questions at all, please contact the team member you are working with, or email us directly at Sponsorship@4907.ca. Our team looks forward to getting to know you and working with you this year!

All the best,

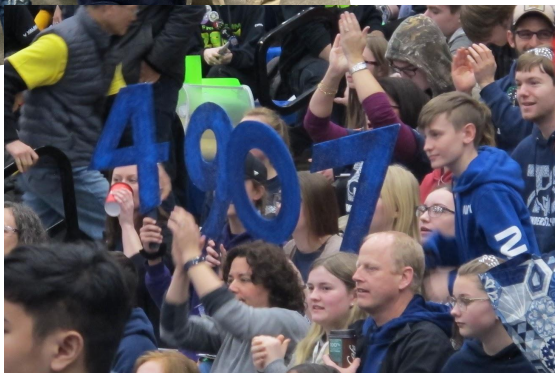

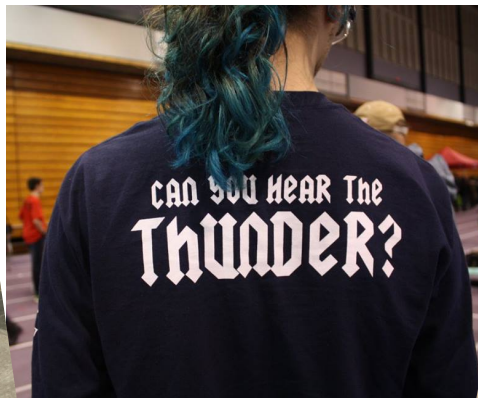

Allie Pimlatt
Sponsorship Team Captain
Team 4907, The ThunderStamps

THUNDERSTAMPS

Team 4907: The ThunderStamps!

Our team is composed of four main branches: build, programming, sponsorship, and media. Through each branch, the philosophies of STEAM are developed in our members. On the build team, students get hands-on experience, designing, prototyping, building, testing and driving robots! Our programming team, introduces eager students to the world of Java and the power of programming! The media team teaches the importance of a communication and public appearances, both in person and through various online platforms. Finally, the sponsorship team students learn the fundamentals of running a business, and how to problem-solve in a professional and courteous manner. Through our team, we are preparing the next generation of engineers, scientists, CEO's, accountants, marketers and more!

How You Can Help

Listed below are multiple ways of contributing to our team. We encourage you to explore every option, and find the best fit for your company.

FINANCIAL DONATIONS:

Building a robot is expensive, and it is impossible for us to finance our team without donations from generous sponsors like you! If you choose this option your company will be entitled to receive a tax receipt, OR the benefits and recognition outlined in the sponsorship package on the following page.

SUPPLIES AND EQUIPMENT DONATIONS

Our build team requires various supplies and equipment to build a new robot each year. If preferred, we would gladly accept a donation of materials. By choosing this option, you will be entitled to receive the full recognition and benefits of our sponsorship levels based on the total monetary value of the supplies donated.

DONATIONS IN KIND

If none of the previously mentioned options are feasible at this time, a donation in kind is a great alternative! Choosing this option, will also allow you to receive the recognition and benefits of our sponsorship levels based on the total monetary value of the services or goods donated.
